

No. of Functional Features Included in the Solution

Project: ComicCraft | AI/ML & Generative AI

1. Feature Summary

The current ComicCraft text-generation solution includes the following core functional features.

No.	Functional Feature	Description
1	Prompt Input	Accepts the user's creative comic/story idea.
2	AI Story Generation	Uses Gemini AI to generate comic-style story content.
3	Four-Panel Structure	Organizes the generated story into four comic panels.
4	API Communication	Connects the frontend to the FastAPI backend.
5	Result Display	Displays the generated output in the web interface.
6	Configuration	Uses environment-based settings for API credentials.

2. Current Core Feature Count

6 core functional features are documented for the current working implementation.

3. Future Functional Features

- Visual image generation for comic panels.
- Character customization and consistency.
- Speech bubbles and richer dialogue layout.
- Comic PDF/image export.
- Saved stories and reusable characters.
