

Project Executable Files

Project: ComicCraft | AI/ML & Generative AI

1. Purpose

This document identifies the main files and folders required to run the ComicCraft application.

2. Executable / Runtime Files

- **run.py** - application entry point used to start the FastAPI application.
- **app/** - backend/application source code.
- **templates/** - HTML templates used by the web interface.
- **static/** - frontend CSS, JavaScript and related static assets.
- **requirements.txt** - Python package dependencies.
- **.env.example** - example environment configuration.
- **.venv/** - local Python virtual environment created during setup; normally not committed to GitHub.

3. Typical Run Commands

```
py -m venv .venv
.\.venv\Scripts\Activate.ps1
pip install -r requirements.txt
python run.py
```

4. Runtime Configuration

A valid Gemini AI API configuration is required for AI generation. Store credentials in environment variables and do not commit secret keys to the repository.

5. Result

These files together provide the basic application runtime structure for ComicCraft.
