

Brainstorming & Idea Prioritization

ComicCraft – AI/ML & Generative AI Project

1. Project Background

ComicCraft is a Generative AI application that helps users transform a simple creative idea into a structured comic story. The project focuses on reducing the effort required to plan characters, scenes, dialogue and panel flow.

2. Brainstormed Ideas

- AI comic story generator from a text prompt.
- Automatic four-panel comic story creator.
- AI character and scene description generator.
- Comic dialogue and speech-bubble generator.
- AI-assisted visual panel generation.
- Downloadable comic as image or PDF.

3. Idea Prioritization

Idea	Value	Feasibility	Priority
Text-to-comic story generation	High	High	Core
Four-panel structure	High	High	Core
Character/scene descriptions	High	Medium	Next
Visual image generation	High	Medium	Next
PDF/image export	Medium	High	Later

4. Selected Idea

Build a web-based AI comic story generator where the user enters a creative prompt and receives a generated story organized into four comic panels.
